

AMENDMENTS TO THE SPECIFICATION

Please delete the original Sequence Listing.

Please amend the paragraph beginning on page 22, line 6, as follows:

*The MAGE-A3/A6-specific clone M171.8C recognizes the MAGE-A3/B*3501 epitope EVDPIGHLTY (SEQ ID NO: 19) previously described by SCHULTZ et al., (2001, mentioned above). As this TIL clone also reacts with MAGE-A6, this indicates that the MAGE-A6 peptide 168-176 (EVDPIGHVY; SEQ ID NO: 2), which differs from the MAGE-A3 epitope by virtue of a single amino acid at position 8, constitutes another HLA-B*3501-restricted melanoma epitope.

Please amend the paragraph beginning on page 30, line 1, as follows:

The results are given in Figure 6: along the y-axis, the percentage of cell lysis obtained; along the x-axis, the concentration of peptide PLDCVLYRY (\square ; SEQ ID NO: 20), or VPLDCVLYRY (\blacklozenge ; SEQ ID NO: 13). The EC50 for the peptide PLDCVLYRY (SEQ ID NO: 20) is 0.6 μ m, whereas the EC50 for the peptide PLDCVLYRY (SEQ ID NO: 20) is 10 μ m.

Page 34 (Abstract), after the last line, beginning on a new page, please insert the attached Sequence Listing.
